✓ Long Nose, Soft Jaw	T7887	26.70	24.27
✓ Pliers, Nose Grip	T7890	59.42	54.02

BENCH CHISELS

A 'bench' chisel is a term to specify the style of general purpose woodworking chisels used in the majority of woodworking pursuits. The bevel edge bench chisel has become the most widespread style supplanting in popularity the rectangular section 'firmer' chisel, a dominant design of earlier generations.

Many chisel brands with long established names and reputations in western markets are now made entirely, or in part, in east Asia and are not the quality they once were. These reputable brands are frequently passed off as "Swedish" or "British" made and can be marketed as so because of slack truth-in-labelling laws now common in many countries.

Stubai continue to manufacture their chisels in Austria from Austrian or German steel stock. They offer two alternative steel compositions, their DIN standard and their in-house proprietary 'spezial' tool steel. This means you have a choice of excellent or supreme. The 'spezial' blades from Stubai routinely win when western chisels are assessed in bench chisel reviews.

The Wood Works import directly from the factory which means remarkably good value. Each pattern, with the exception of the #3575, is available individually and in sets. The #3575 are available individually.

#3530 'SWEDISH' SERIES

The top of the range for Stubai. Called their Swedish range in deference to E.A.Berg, the revered manufacturer from earlier times.

These have the top of the range 'spezial' steel, shock washer and a hoop & ferrule, white beech handle.

The Stubai 'spezial' alloy chisels regularly win competitive tests of all European and British makes. All chisels supplied with tip guards.

DOWELING JIGS - JOINT GENIE - BRITISH MADE

Doweling jigs might be seen as a bit old school but not Joint Genie which, as well as being the world's most flexible doweling system, is equally useful for locating shelf support pins and other hardware in both sheet and post & rail work.

JOINT GENIE DOWELING JIGS - BRITISH MADE

Doweling remains one of the simplest and strongest methods of joining wood and one of the safest for schools.

Given a quality adhesive and hardwood dowels, Joint Genie jigs allow the simple joining of sheet and post & rail structures for a wide variety of woodworking.

See our site for a link to a demonstration DVD. Contact us for dowel purchase options

SCROLL SAWING

The Multicut 1 is our best selling quality scroll saw with an excellent service record & with thousands in use in Australian schools. A quality scroll saw is undoubtedly the safest powered wood saw available for use in schools. Statistically the very small risk profile of scroll saws suggests eye injury from broken blade parts & being hurt by machines falling off benches exceed the minimal risk of being cut by the blade. Hegner scroll saws can be bolted to the bench & the patented blade retaining system greatly minimises risk from blade fragments. Despite this we still suggest eye protection must be worn at all times. The Multicut 1 is available in either single or variable speed models. Blade guards & work hold down arms available. Variable speed is factory fitted & must be specified at order time. Note that Hegner scroll saws use pinless blades of which there are numerous patterns & sizes to enable working with the widest variety of materials. Other scroll saw use pinned blades which are more expensive, available in only 3 or 4 patterns & may be limited to wood. The patented Hegner blade clamp arrangement contains broken blades & minimises risks from pieces of blade being thrown about. These machines are fully supported with spare parts & maintenance across Australia. We routinely service machines more than 25 years old which are still in excellent functioning condition.

Hegner Multicut 1

Hegner Multicut 2S

- ✓ Saw, Scroll, Multicut 1, single speed
- ✓ Saw, Scroll, Multicut 1, vari speed
- ✓ Saw, Scroll, Multicut-2S, vari speed

DECORATIVE JOINTING

The ZFG is a simple, safe machine with excellent dust/chip extraction which offers students the capability of making perfect finger joints. We have a number of school customers making serving trays, lidded boxes and pencil boxes made with the ZFG for middle and senior secondary years. The ZFG has a fully guarded cutter and has proven a safer option than the use of hand held routers on dovetail jigs. Now with improved, more powerful router motor.

Helicly ground cutters for ZFG

FINGER JOINTER - HEGNER - GERMANY

- ✓ Finger Jointer, ZFG Comb/Finger Jointing Machine

ITEM	RRP	Ex GST
M0478	1,195.00	1,086.36

CUTTERS

The machine is supplied with either 8mm or 6.35 (1/4 inch) shank helicly ground special router cutters in 4mm, 6mm, 8mm and 10mm diameters. The 8mm shank cutters are preferred as they are more robust. There is also a 12mm diameter cutter available

VACUUMS

HEGNER MAXIMUS UNDERBENCH VACUUM

The Hegner Maximus is the perfect machine for installations where distributed dust control is installed.

The Maximus from Hegner is a down-size, quiet vacuum with variable suction which is ideally suited to placement under work benches.

It has a master-slave feature which allows bench top machines to automatically switch the vacuum on and off.

This saves on power consumption and reduces noise in the work room. Only 62dB (A) at max power

- ✓ Vacuum/Dust Extractor, Maximus 13E
- ✓ Bag, Filter, for Hegner Maximus 13E, 10 pieces

Specifications

Model	Hegner Maximus 13E
Height	405mm
Width	290mm
Depth	400mm
Weight	tba
Mains	230 volt AC, 50 Hz
Max power	1250 watts
Noise at Max power	62dB(A)
Variable suction & noise	Yes
Dust volume	13 litres
Mains cable	10 metres
Dust hose	2.5 metres
Hose swivel connection	Yes
Suction throughput	Max. 60 litres/sec
Vacuum Pressure	290 mbar
Filtration	HEPA H21
Bags	Yes, disposable (See C0720)
Accessories	Floor wand, Crevice & Furniture Brush Upholstery nozzles

SANDING

HEGNER SANDERS

The WSM German made Hegner disc sander has a 300mm, fully guarded velcro equipped hook disc & is equipped with no-volt starting. It is fitted with an efficient dust collection port.

The HSM-300S has a tilting disc and fixed table which allows heavier pieces to be work. Digital tilt gauge is an option.

The TWS 230 table drum sander has a sanding width of 230mm and table 520mm x 320mm. Fence is optional. The TWS is the perfect companion machine for the Hegner scroll saws and finger jointers. With a fence fitted (please order as accessory) and table height perfectly adjusted it can final sand most scroll saw and box projects very safely.

The TBS 500 belt sander tilts so that the sanding platten can be either horizontal or vertical. The optional bobbin attachment fits to the belt sander. The machine has no-volt starting and excellent dust porting. (Stand illustrated but not supplied)

Brass Washers

CONSUMABLES

ADHESIVES

All our PVA range is made in Australia from quality fresh ingredients.

Our renowned "yellow" PVA has superior strength, good sandability and quick cure.

The crosslinking PVA has the strongest bond of them all.

The White Sandable is an ultra hard cure PVA which cures slowly & allows time for complex glue ups.

- ✓ White Crosslinking PVA, T3275, 500ml, (decant)
- ✓ White Crosslinking PVA, T3275, 1 Litre, (decant)
- ✓ White Crosslinking PVA, T3275, 5 litres, (decant)

SHELLAC

Cured shellac is safe enough to be rated as a food and offers a quick and safe method of achieving a quality finish on numerous projects.

The best method of ensuring a long shelf life and superior finishes is to use DAA (Denatured Absolute Alcohol) Spirits.

It is important that the DAA can be appropriately stored.

A standard concentrate is simply and quickly made up using a 1 to 4 ratio of dry shellac by weight to DAA spirits by liquid volume e.g. 500gms mixed with 2 litres of DAA.

DAA SPIRITS

- ✓ Spirits, DAA, 100% Industrial Alcohol, 1 litre
- ✓ Spirits, DAA, 100% Industrial Alcohol, 5 litres
- ✓ Spirits, DAA, 100% Industrial Alcohol, 20 litres
