

# CATALOGUE NOW ON-LINE

For the latest version of this catalogue go to our website at [www.thewoodworks.com.au](http://www.thewoodworks.com.au)  
Click on the Home Page link to the school catalogue.

## SCOPE OF THIS CATALOGUE

We sell in excess of 8,000 products. This catalogue lists a smaller selection of items which have proven popular with schools over many years. For other items please contact us or search our website at [www.thewoodworks.com.au](http://www.thewoodworks.com.au).

## ACCOUNTS

We offer immediate terms to any Australian school. No account opening procedures are needed.  
All we ask is that orders are on official school letterhead and have an Order Number

## FIXED WRITTEN QUOTES

To speed up your admin time we can supply you with a written quote for any of our items.

## HEGNER MACHINES - SALES & SERVICE

We are very proud of the service record of our Hegner machines many of which are still performing as new after 25 years in Australian schools. We can use a metropolitan or national courier service to ship machines back to us for evaluation if you wish. We will provide a repair quote and advise the current replacement cost of the machine to assist with your repair decision.

We offer service in-situ in schools in most of suburban Sydney. Alternatively we sell Hegner spare parts for schools who wish to carry out their own servicing.

If you need machines evaluated for repair or wish to arrange service use the hotline below.

## SCROLL SAWING

Note: There are 7 models of Hegner scroll saw available. Please search our site for those not detailed below

### SCROLL SAWS - HEGNER - GERMANY

The Multicut 1 is our best selling quality scroll saw with an excellent service record and with thousands in use in Australian schools. A quality scroll saw is undoubtedly the safest powered wood saw available for use in schools. Statistically the very small risk profile of scroll saws suggests eye injury from broken blade parts and being hurt by machines falling off benches exceed the minimal risk of being cut by the blade. Hegner scroll saws can be bolted to the bench and the patented blade retaining system greatly minimises risk from blade fragments. Despite this we still suggest eye protection must be worn at all times.

The Multicut 1 is available in either single or variable speed models. Blade guards and work hold down arms are now standard for all school orders.

Variable speed is factory fitted and must be specified at order time. Note that Hegner scroll saws use pinless blades of which there are numerous patterns and sizes to enable working with the widest variety of materials.

Other scroll saw make use pinned blades which are more expensive, available in only 3 or 4 patterns and may be limited to wood.

The patented Hegner blade clamp arrangement contains broken blades and minimises risks from pieces of blade being thrown about.

These machines are fully supported with spare parts and maintenance across Australia. We routinely service machines more than 25 years old which are still in excellent functioning condition.

## DECORATIVE JOINTING

The ZFG is a simple, safe machine with excellent dust/chip extraction which offers students the capability of making perfect finger joints. We have a number of school customers making serving trays, lidded boxes and pencil boxes made with the ZFG for middle and senior secondary years. The ZFG has a fully guarded cutter and has proven a safer option than the use of hand held routers on dovetail jigs. Now with improved, more powerful router motor.

Helically ground cutters for ZFG

**JOINT GENIE DOWELING JIGS - BRITISH MADE**

Doweling remains one of the simplest and strongest methods of joining wood and one of the safest for schools.

Given a quality adhesive and hardwood dowels, Joint Genie jigs allow the simple joining of sheet and post & rail structures for a wide variety of school woodworking. Doweling requires the use of much safer power or hand drills than equivalent methods using hand held routers.

See our site for a link to a demonstration DVD. Contact us for dowel purchase options

**VACUUMS**

**HEGNER MAXIMUS UNDERBENCH VACUUM**

The Hegner Maximus is the perfect machine for installations where distributed dust control is installed.

The Maximus from Hegner is a down-size, quiet vacuum with variable suction which is ideally suited to placement under work benches. It has a master-slave feature which allows bench top machines to automatically switch the vacuum on and off.

This saves on power consumption and reduces noise in the work room. Only 62dB (A) at max power

- ✓ Vacuum/Dust Extractor, Maximus 13E
- ✓ Bag, Filter, for Hegner Maximus 13E, 10 pieces

## BENCH PLANE SPARE PARTS

For several years spares for Stanley planes for been only intermittently available and in many cases only in quite extensive kits. In addition to these kits we now can offer some parts to the component level for all other than Y levers, lateral adjust levers and frog clips all of which require the purchase of a full frog assembly.

### Spares

1	Cap screw	6	Adjusting nut	11	Knob	16	Cutting iron
2	Lever cap	7	Adjusting nut screw	12	Handle bolt & nut	17	Frog adjusting screw
3	Lever cap screw	8	Lateral adjusting screw	13	Knob bolt & nut	18	Back iron
4	Frog complete	9	Frog screw	14	Handle screw		
5	"Y" adjusting lever	10	Handle	15	Plan body

## P&N HIGH SPEED STEEL WOODTURNING TOOLS - P&N - AUSTRALIA

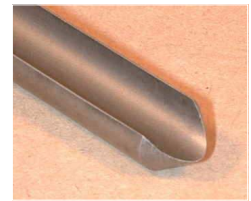

P&N tools are fabricated in Australia using Austrian high speed steel. They have many features which make them an excellent choice for school use. They are fitted with very tough Spotted Gum handles and the gouge flutes are ground extra long for extended tool life. The skews have a fully rounded bottom edge - the 24mm skew is 8mm thick, not the usual 6mm.

Note: We supply round nose scrapers for the price of square scrapers for no extra charge

## SHARPENING

### SLOW SPEED WATER GRINDERS - SCANGRIND - DENMARK

Slow speed water grinders sharpen all carbon steel edge tools with minimal risk to the operator. Water grinders are a perfect solution for bench and carving chisels and hand plane blades. The wheel rotates slowly in a water bath making it impossible to overheat the tool. These machines are safer than high speed bench grinders and the grinding process is slower and more controllable. Item Code M0004 is supplied with a diamond honing lapping plate which allows for final honing of edges. There are accessories for assisted grinding, repeatability and additional precision - see below.

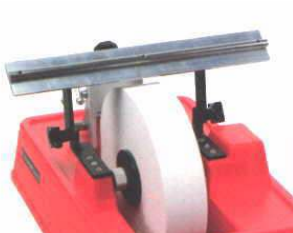

### WATER GRINDERS , ACCESSORIES & SPARES

- ✓ Grinder, Water, Scan 200EK, #SC200EK
- ✓ Unit, Base, 'Startset', for Scangrind 200, #3800025

**HIGH SPEED BENCH GRINDERS**

High speed bench grinders sharpen all steel tools including high speed steel turning tools. The grinding wheels supplied with the great majority of bench grinders are suited to grinding mild steel for welding and not tool sharpening. An aluminium oxide cool running wheel should be fitted for tool sharpening. The grinder tool rests of the majority of high speed bench grinders are unsuited to tool sharpening. The McNaughton grinder rest and accessories offer great assistance with precision grinding for all straight edge tools and, in particular, gouge forms for carving and turning. A dressing stick, either a carborundum block or diamond point, is an essential tool to keep grinding wheels maintained. Our grinder is Danish made and comes with both a regular and a quality sharpening wheel.

**HAND SHARPENING EQUIPMENT**

Diamond sharpening plates are now available in a range of grits which means they are a complete alternative to other sharpening and honing systems. They are very durable and do not cup after extended use. Waterstones offer the ultimate edge however are not as durable as other stones or diamond plates and must be used with a honing guide. Stropps should be used with honing compound. Aluminium oxide wheels are the preferred wheel for tool sharpening on a high speed bench grinder. A honing guide which holds the straight edge tool at the correct angle is strongly recommended.

## PROJECT COMPONENTS & MATERIALS

Wood Works supplies some sizes of pre-cut plywood and pine for school projects. We supply Radiata Pine in solid wood form and Hoop Pine as plywood, both of which are fully plantation grown in Australia and are sustainably harvested. The pine is supplied fault docked which removes major knots and blemishes and is suited to many school projects. The Hoop Pine ply is a clear, pale, fine grained ply which cuts smoothly and is easily finished. It is ideal for pyrography (wood burning) projects.

Minimum orders apply. Some popular sizes are listed below. Other sizes available on request.

### MEDIA STORAGE

These storage racks for DVD, CD & VHS Tape cases are an ideal basis for a school project. Spring finger racks hold in place by the pressure from spring loaded plastic fingers which partly eject the case when it is pressed and disengaged from the rack. These racks are suited to tower use or used flat on their backs in a drawer arrangement.

### BALL-POINT PEN MAKING ON THE LATHE

These ball point pen mechanisms allow turned pens to be made on the lathe. A mandrell to hold the pen sections is strongly advised and a pen mill to square the ends on the sections prior to turning helps produce a high quality result. The brass tubes require a brad point 7mm drill

- ✓ DATA SHEET - Making Twist-Action Ball-Point Pens
- ✓ Pen Sets, Ball Point Twist, Gold Clip, pkt 5

## SALT & PEPPER MILL GRINDERS ON THE LATHE

Salt and pepper mills are a popular project for wood turners. The ready availability of mechanisms - metal for pepper and hard plastic for salt - requires only the mill body and top to be made. Any wood can be used with the possible exception of highly scented or resinous woods which may tend to taint the contents.

# CONSUMABLES

## ADHESIVES

All our PVA range is made in Australia from quality fresh ingredients.

Our renowned "yellow" PVA has superior strength, good sandability and quick cure.

The crosslinking PVA has the strongest bond of them all.

The White Sandable is an ultra hard cure PVA which cures slowly & allows time for complex glue ups.

## PVA Glues

## SHELLAC

Cured shellac is safe enough to be rated as a food and offers a quick and safe method of achieving a quality finish on numerous projects. The best method of ensuring a long shelf life and superior finishes is to use DAA (Denatured Absolute Alcohol) Spirits.

It is important that the DAA can be appropriately stored.

A standard concentrate is simply and quickly made up using a 1 to 4 ratio of dry shellac by weight to DAA spirits by liquid volume e.g. 500gms mixed with 2 litres of DAA.

## DAA SPIRITS

## HAND TOOLS

We supply in excess of 8,000 items from manufacturers across the world. The hand tool listing below is only a small part of the range we offer and is filtered by our long experience in dealing with schools. Please contact us for items not listed below. We refuse to market what amounts to landfill and, as a response to the extremely poor quality tools and equipment being offered to many schools and the concerns expressed to us more or less daily by teachers having to use these items, we also note the country of origin and recognised brands of the tools we sell. All our tools come with warranty and all have brands which are meaningful and manufactured by reputable makers.

**Tapered Plug Cutters, Brad Point Wood Drills & Universal Borers**

Plug cutters cut plugs in either face or end grain, usually in matching wood, although they can be used for contrasting effect, which are often used to conceal screw heads. The use of a drill press and good work-piece clamping practice are essential when using plug cutters. Snug plug cutters are superior because they make a slightly tapered plug which fully closes the hole they are hammered into. Matching brad point or spur lip drills offer smooth cut holes and, with careful wood selection, invisible plugging. Universal borers offer a range of larger sized, smoothly cut holes for numerous project requirements. A drill press is essential.

## Brad Point Drills

## Universal Borers

Brad point drills are optimised for cutting smooth edge holes in wood. Universal borers are a superior alternative to forstner bits and excel at large diameter, smoothly cut, shallow holes.

**Beakers - Graduated**

- ✓ Polypropylene, 50 ml, #1802
- ✓ Polypropylene, 100 ml, #1803
- ✓ Polypropylene, 250 ml, #1805
- ✓ Polypropylene, 500 ml, #1806
- ✓ Polypropylene, 1000 ml, #1808

- ✓ Polypropylene, Blue Graduations, 25 ml, #1821
- ✓ Polypropylene, Blue Graduations, 100 ml, #1823
- ✓ Polypropylene, Blue Graduations, 500 ml, #1825
- ✓ Polypropylene, Blue Graduations, 1000 ml, #1826
- ✓ Polypropylene, Blue Graduations, 3000 ml, #818

**Jugs**

- ✓ Measuring, Polypropylene, Squat Profile, 500 ml
- ✓ Measuring, Polypropylene, Squat Profile, 1000 ml
- ✓ Measuring, Polypropylene, Squat Profile, 2000 ml
- ✓ Measuring, Polypropylene, Squat Profile, 3000 ml
- ✓ Measuring, Polypropylene, Squat Profile, 5000 ml

- ✓ Measuring, Polypropylene, Tall Profile, 250 ml
- ✓ Measuring, Polypropylene, Tall Profile, 500 ml
- ✓ Measuring, Polypropylene, Tall Profile, 1000 ml
- ✓ Measuring, Polypropylene, Tall Profile, 2000 ml
- ✓ Measuring, Polypropylene, Tall Profile, 3000 ml

**Trays**

- ✓ Tray, Deep, ABS, 253 x 353 x 41 mm, #5707
- ✓ Tray, Deep, ABS, 252 x 252 x 42 mm, #5708
- ✓ Tray, Deep, ABS, 252 x 352 x 81 mm, #5711
- ✓ Tray, Deep, ABS, 252 x 252 x 82 mm, #5712

- ✓ Tray, Deep, PVC, 150 x 200 x 45 mm, #280
- ✓ Tray, Deep, PVC, 200 x 250 x 60 mm, #281
- ✓ Tray, Deep, PVC, 260 x 320 x 70 mm, #282
- ✓ Tray, Deep, PVC, 300 x 350 x 80 mm, #283

- ✓ Pipette, Dropping, Bellows Type, 1.5ml, 10 pieces
- ✓ Pipette, Dropping, Bellows Type, 5.0ml, 10 pieces

- ✓ Rod, Stirring, Polypropylene, 244mm, 10 pcs

- ✓ Capacity 10ml, Grads. at 2ml, 13.5mm x 140mm
- ✓ Capacity 25ml, Grads. at 5ml, 18.0mm x 195mm
- ✓ Capacity 50ml, Grads. at 10ml, 25.5mm x 199mm
- ✓ Capacity 100ml, Grads. at 10ml, 30.5mm x 249mm
- ✓ Capacity 500ml, Grads. at 50ml, 55.0mm x 361mm
- ✓ Capacity 1000ml, Grads. at 100ml, 66.0mm x 439mm

**Drum Tap**

- ✓ Tap, for threaded Drums, 3/4 inch BSP, #375
