

# CATALOGUE NOW ON-LINE

For the latest version of this catalogue go to our website at [www.thewoodworks.com.au](http://www.thewoodworks.com.au)  
Click on the Home Page link to the school catalogue.

## SCOPE OF THIS CATALOGUE

We sell in excess of 8,000 products. This catalogue lists a smaller selection of items which have proven popular with schools over many years. For other items please contact us or search our website at [www.thewoodworks.com.au](http://www.thewoodworks.com.au).

## ACCOUNTS

We offer immediate terms to any Australian school. No account opening procedures are needed.  
All we ask is that orders are on official school letterhead and have an Order Number

## FIXED WRITTEN QUOTES

To speed up your admin time we can supply you with a written quote for any of our items.

## HEGNER MACHINES - SALES & SERVICE

We offer service in-situ in schools in most of suburban Sydney. For schools in other locations, or at your preference, we service machines at two alternative Sydney locations. Alternatively we sell spare parts for the Hegner range for schools who wish to carry out their own servicing.

If you need machines serviced use the service hotline below - we will pick up the machine and deliver it back to you as part of the service. We offer a fixed quote option for machines which may be close to the end of their service life. If you use this option you can assess prior to proceeding with a repair, whether it is worthwhile.

**FOR SERVICE CALL (02) 9979 7797**

## HAND SAW SHARPENING

We offer schools bulk rates to sharpen hand saws. Consider this over the next holiday break.

## MACHINERY & ACCESSORIES

### SCROLL SAWING

Note: There are 7 models of Hegner scroll saw available. Please search our site for those not detailed below

#### SCROLL SAWS - HEGNER - GERMANY

The Multicut 1 is our best selling quality scroll saw with an excellent service record and with thousands in use in Australian schools. It is available in either single or variable speed models. Blade guards are available with the purchase of a work piece hold down arm. Variable speed is factory fitted and must be specified at order time. Note that Hegner scroll saws use pinless blades of which there are many patterns and sizes to enable working with the widest variety of materials. The Hegner blade clamp arrangement contains broken blades and minimises risks from pieces of blade being thrown about.

**Hegner Multicut 1**

**Hegner Multicut 2**

The Hold Down Arm Item A1000 is a recommended accessory and the Quick Release Clamp Item S0975 greatly assists pierced work where the blade is fed through a drilled hole and reattached to the top arm.

The single speed machines deliver 1400 strokes / min

The Variable speed deliver 400 to 1400 strokes / min

## BLADES

There are several patterns of pinless blades available for use with Multicut 1 machines. General purpose wood cutting blades will also cut plastics. In the selection below #14 is a little thinner than a regular coping saw blade and #5 is about the thinnest we recommend for school use. There are special metal cutting blades. please contact us for details.

## DECORATIVE JOINTING

The ZFG is a simple, safe machine with excellent dust/chip extraction which offers students the capability of making perfect finger joints. We have a number of school customers who include serving tray, lidded boxes and pencil boxes all made with the ZFG for middle and senior secondary years. The ZFG has a fully guarded cutter and has proven a safer option than the use of hand held routers on dovetail style jigs. Now with improved more powerful router motor.

Helically ground cutters for ZFG

### FINGER JOINTER - HEGNER - GERMANY

### DOMINO SLIP TENON JOINTING MACHINE

The revolutionary Domino jointing system cuts matching mortises in pieces to be joined which allows the insertion of slip tenons. Given the strength of modern adhesives and the toughness of the slip tenons this offers a superior method than dowelling.

Domino plates available in 5,6,8 and 10mm thicknesses.

Q-Set includes support bracket, 1 x 5mm cutter, trim stop and cross stop.

Q-Plus includes support bracket and 1 x 5mm cutter.

### HIGH EFFICIENCY VACUUMS

The CT22 and CT33 vacuums have HEPA (High Efficiency Particulate) filters which filter air to 0.03 microns. They have a slave power socket which enables any other power tool to automatically trigger the vacuum on and off, perfect for scroll saws and hand held sanders. This both limits noise in the work area and saves power. Permanent re-usable filter sacks also available as accessory.

## SANDING

### HEGNER SANDERS

The WSM German made Hegner disc sander has a 300mm, fully guarded velcro equipped hook disc & is equipped with no-volt starting. It is fitted with an efficient dust collection port.

The TWS 230 table drum sander has a sanding width of 230mm and table 520mm x 320mm. Fence is optional. The TWS is the perfect companion machine for the Hegner scroll saws and finger jointers. With a fence fitted (please order as accessory) and table height perfectly adjusted it can final sand most scroll saw and box projects very safely.

The TBS 500 belt sander tilts so that the sanding platten can be either horizontal or vertical. The optional bobbin attachment fits to the belt sander. The machine has no-volt starting and excellent dust porting. (Stand illustrated but not supplied)

## BENCH PLANE SPARE PARTS

For several years spares for Stanley planes for been only intermittently available and in many cases only in quite extensive kits. In addition to these kits we now can offer some parts to the component level for all other than Y levers, lateral adjust levers and frog clips all of which require the purchase of a full frog assembly.

### Spares

**P&N HIGH SPEED STEEL WOODTURNING TOOLS - P&N - AUSTRALIA**

P&N tools are fabricated in Australia using Austrian high speed steel. They have many features which make them an excellent choice for school use. They are fitted with very tough Spotted Gum handles and the gouge flutes are ground extra long for extended tool life. The skews have a fully rounded bottom edge - the 24mm skew is 8mm thick, not the usual 6mm.

Note: We supply round nose scrapers for the price of square scrapers for no extra charge

**P&N SPINDLE (conventional flute)**

|                                   | ITEM  | RRP    | LIST  |

## SHARPENING

### SLOW SPEED WATER GRINDERS - SCANGRIND - DENMARK

Slow speed water grinders sharpen all carbon steel edge tools with minimal risk to the operator. Water grinders are a perfect solution for bench and carving chisels and hand plane blades. The wheel rotates slowly in a water bath making it impossible to overheat the tool. These machines are safer than high speed bench grinders and the grinding process is slower and more controllable. Item Code M0004 is supplied with a diamond honing lapping plate which allows for final honing of edges. There are accessories for assisted grinding, repeatability and additional precision - see below.

#### WATER GRINDERS , ACCESSORIES & SPARES

### HIGH SPEED BENCH GRINDERS

High speed bench grinders sharpen all steel tools including high speed steel turning tools. The grinding wheels supplied with the great majority of bench grinders are suited to grinding mild steel for welding and not tool sharpening. An aluminium oxide cool running wheel should be fitted for tool sharpening. The grinder tool rests of the majority of high speed bench grinders are unsuited to tool sharpening. The McNaughton grinder rest and accessories offer great assistance with precision grinding for all straight edge tools and, in particular, gouge forms for carving and turning. A dressing stick, either a carborundum block or diamond point, is an essential tool to keep grinding wheels maintained. Our grinder is Danish made and comes with a regular and a quality sharpening wheel.

#### BENCH GRINDERS, ACCESSORIES & SPARES

## HAND SHARPENING EQUIPMENT

Diamond sharpening plates are now available in a range of grits which means they are a complete alternative to other sharpening and honing systems. They are very durable and do not cup after extended use.

Waterstones offer the ultimate edge however are not as durable as other stones or diamond plates and must be used with a honing guide

Strops should be used with honing compound. Aluminium oxide wheels are the preferred wheel for tool sharpening on a high speed bench grinder. A honing guide which holds the straight edge tool at the correct angle is strongly recommended.

## PROJECT COMPONENTS & MATERIALS

Wood Works supplies some sizes of pre-cut plywood and pine for school projects. We supply Radiata Pine in solid wood form and Hoop Pine as plywood, both of which are fully plantation grown in Australia and are sustainably harvested. The pine is supplied fault docked which removes major knots and blemishes and is suited to many school projects. The Hoop Pine ply is a clear, pale, fine grained ply which cuts smoothly and is easily finished. It is ideal for pyrography (wood burning) projects.

Minimum orders apply. Some popular sizes are listed below. Other sizes available on request.

### HOOP PINE FACED PLYWOOD

- ✓ Ply, Hoop Pine, A4, 295mm x 210mm x 4mm, Packs 20

#### MEDIA STORAGE

These storage racks for DVD, CD & VHS Tape cases are an ideal basis for a school project. Spring finger racks hold in place by the pressure from spring loaded plastic fingers which partly eject the case when it is pressed and disengaged from the rack. These racks are suited to tower use or used flat on their backs in a drawer arrangement.

#### SPRING FINGER STYLE

- ✓ CD Rack Insert, holds 20, 100 Sets
- ✓ CD Rack Insert, holds 20, each
- ✓ CD Rack Insert, Half Height, holds 10, 100 Sets
- ✓ CD Rack Insert, Half Height, holds 10, each
- ✓ CD Rack Insert, for Double CD Case, holds 10, 100 Sets
- ✓ CD Rack Insert, for Double CD Case, holds 10, each
- ✓ DVD Rack Insert, holds 15, 100 sets
- ✓ DVD Rack Insert, holds 15, 1 set

## BALL-POINT PEN MAKING ON THE LATHE

These ball point pen mechanisms allow turned pens to be made on the lathe. A mandrell to hold the pen sections is strongly advised and a pen mill to square the ends on the sections prior to turning helps produce a high quality result.

The brass tubes require a brad point 7mm drill

- ✓ DATA SHEET - Making Twist-Action Ball-Point Pens
- ✓ Pen Sets, Ball Point Twist, Gold Clip, pkt 5
- ✓ Pen Sets, Ball Point Twist, Plain Black Clip, pkt 5
- ✓ Pen Sets, Ball Point Twist, Australia Black Clip, pkt 5

## SALT & PEPPER MILL GRINDERS ON THE LATHE

Salt and pepper mills are a popular project for wood turners. The ready availability of mechanisms - metal for pepper and hard plastic for salt - requires only the mill body and top to be made. Any wood can be used with the possible exception of highly scented or resinous woods which may tend to taint the contents.

### INSERT & CONCEALED MECHANISM QUARTZ CLOCKS

Concealed mechanism clocks can be recessed into the rear side of a piece of wood and hands fitted to the shank which protrudes through the body. There are numerous hand patterns to suit concealed mechanism clocks and numerals in Arabic & Roman styles. Purchase price of items P4007. P4008 & P4009 includes a set of hands and numerals of choice.

Insert clocks can be pressed into a machined or drilled front recess. Batteries are not supplied.

## CONSUMABLES

### ADHESIVES

All our PVA range is made in Australia from quality fresh ingredients.

Our renowned "yellow" PVA has superior strength, good sandability and quick cure.

The crosslinking PVA has the strongest bond of them all.

The White Sandable is an ultra hard cure PVA which cures slowly & allows time for complex glue ups.

**PUTTY 'BRICKS'****SHELLAC**

Cured shellac is safe enough to be rated as a food and offers a quick and safe method of achieving a quality finish on numerous projects.

The best method of ensuring a long shelf life and superior finishes is to use DAA (Denatured Absolute Alcohol) Spirits.

It is important that the DAA can be appropriately stored.

A standard concentrate is simply and quickly made up using a 1 to 4 ratio of dry shellac by weight to DAA spirits by liquid volume e.g. 500gms mixed with 2 litres of DAA.

**DAA SPIRITS**

## FINISHING OILS & WAXES

Our tung oil is pure whereas most formulations marketed as tung oil contain only a small amount of tung oil. Tung oil is non toxic, applicable for use as a finish on kitchen utensils and children's toys.

## HAND TOOLS

We supply in excess of 8,000 items from manufacturers across the world. The hand tool listing below is only a small part of the range we offer and is filtered by our long experience in dealing with schools. Please contact us for items not listed below. We refuse to market what amounts to landfill and, as a response to the extremely poor quality tools and equipment being offered to many schools and the concerns expressed to us more or less daily by teachers having to use these items, we also note the country of origin and recognised brands of the tools we sell. All our tools come with warranty and all have brands which are meaningful and manufactured by reputable makers.

## SAFETY CHUCK - INSTY QUICK CHANGE KEYLESS CHUCKS AND DRILLS - MADE IN USA

Insty safety chucks can be installed in any standard keyed jacob's chuck in either stationery drill press or hand held drills.

Once fitted the use of dangerous chuck keys is eliminated and drills and countersinks can be quickly snapped into and out of the chuck.

## Plug Cutters, Brad Point Wood Drills & Universal Borers

Plug cutters cut plugs in either face or end grain, usually in matching wood, although they can be used for contrasting effect, which are often used to conceal screw heads. The use of a drill press and good work-piece clamping practice are essential when using plug cutters. Snug plug cutters are superior because they make a slightly tapered plug which fully closes the hole they are hammered into. Matching brad point or spur lip drills offer smooth cut holes and, with careful wood selection, invisible plugging.

Universal borers offer a range of larger sized, smoothly cut holes for numerous project requirements. A drill press is essential.
